

Freezer Paper Piecing Tutorial

Step 1:

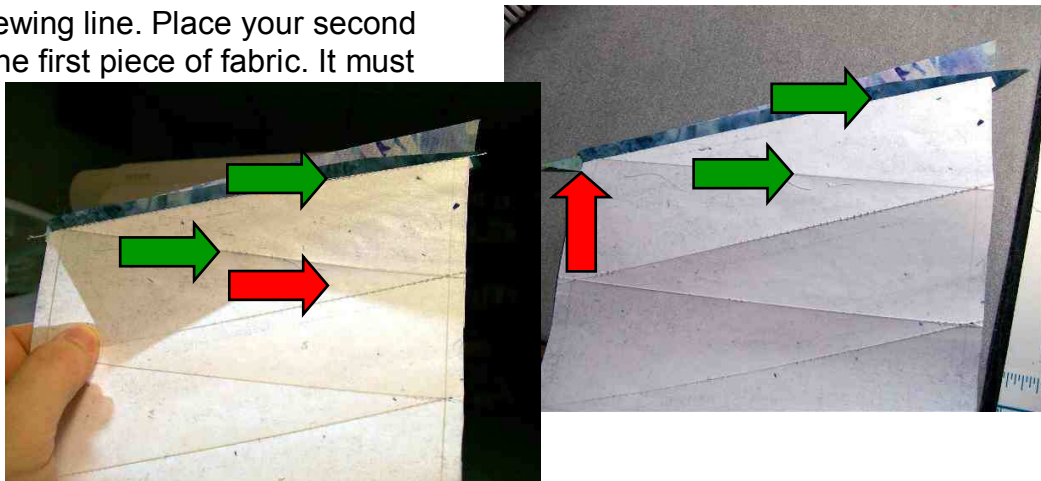

Place your first piece of fabric on the waxy side of the freezer paper, wrong side against the paper. Hold it up to the light to make sure it covers all of the seam allowances. The green arrow shows the sewing line, the red shows the fabric of the seam allowance.

Once you are sure of the placement, iron lightly to fuse the fabric to the freezer paper.

Step 2:

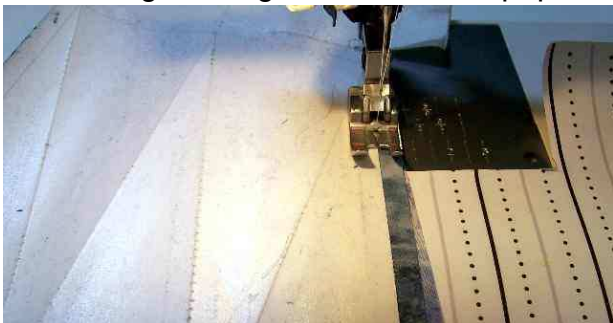

Fold back the foundation on the sewing line. Place your second piece of right sides together with the first piece of fabric. It must cover the next segment of the foundation, including seam allowances. The red arrow shows where the fabric extends past the sewing line, and the green arrows are sewing lines.

When you hold it up to the light you can clearly see that the fabric extends well beyond the seam line.

Step 3:

Sew along the edge of the freezer paper fold.

Step 4:

Trim the excess fabric approximately 1/4" beyond the edge of the fold.

Step 5:

Flip the new piece of fabric forward and press.

Repeat from step 2 until all segments have been added. Trim the excess fabric and peel off the freezer paper for reuse.
